

# Amethyst Class Newsletter

## Our learning this week....

### Survive or Thrive?

#### Maths

This week we have been learning how to read and interpret line graphs as well as practising our reasoning and problem solving skills.

#### English

The children's stories are coming along very well and I have been enjoying sharing them with the children. They are all based on a suspense genre and I am worried I might have nightmares if I read them before I go to bed!

#### Time Tunnel Experience

What a wonderful afternoon we had sharing our learning with all the parents and many grandparents this week. The children were so excited to see so many of you (about 60 visitors!) and loved sharing their books, classroom environment, songs and baking with you. Thank you for your support and such positive comments to myself and the children.

We will begin de-constructing the classroom WW2 environment next week, ready for a surprise new learning environment after Easter.

## Next week....

#### Maths-

Revision

#### English-

Redrafting and finishing stories.

Continue with SATs Reading revision.

#### History

**Review of the learning from our theme.**

PHSE

Next week, we will be taking part in Road Safety activities designed for Year 6 children.

A parent has spotted a great WW2 experience for children – which looks great. If anyone is looking for somewhere to visit in the holidays, here is the link:
