

Amethyst Class Newsletter

Our learning this week....

What Makes Us Richer?

Enterprise

We launched our Enterprise project this week with a Dragon's Den junk challenge. The children had a limited time to remodel some cardboard boxes and plastic containers into a new toy for Christmas. The children then had to present their prototype to the 2 dragons (Brooks and Shrewsbury). These two business women then asked some tricky questions about their potential sales and profit margins!

Maths

This week we have been learning how to identify and calculate with prime, square and triangle numbers. The children challenged themselves with some tricky reasoning questions linked to these number properties. We have finished the week by learning how to use 'BODMAS' to know the order of operations.

English

The children have started to plan a story inspired by our class book 'Cloud Busting'.

Science

We have been researching the long and short term effects that alcohol can have on the body.

Tomorrow we are welcoming Luke Hall (MP) into class to hear about his role and responsibilities working in parliament. Children have led their first peer group and did an amazing job!

Next week....

What Makes Us Richer?

Enterprise

The children will be put in teams to start researching ideas for a product.

Maths

Equivalent fractions and simplifying fractions

English

Writing their stories, following last week's plans.

Reminders..... Clifton Cathedral trip reply slips need returning please.
