

Crystal

In Crystal class this week, the children have been learning how to write a diary, read bar charts, identify shapes, study the water transportation system, create a collage and ride a scooter safely!

We are moving from looking at statistics in maths to learning how to identify shapes which we will carry on next term. We spoke about vertices and edges and how we can use these to identify a shape. We will also be talking about the difference between 2d and 3d shapes.

In English, the children have been getting ready to do their final write of the term after creating some amazing leaflets, ready to persuade you to come to Greece! We are focusing on using first person (I) and keeping our diaries in the correct tense.

I have loved seeing the homework come in. We are very excited to create our own Greek food next Tuesday!

Scooter training, flatbread designing and Greek dancing!

PIC•COLLAGE

Key dates/notices coming up:

Parents outcome and Greek day on the 26th of March. Children are welcome to come dressed up in anything Greek.

INSET day- Thursday 28th March

Coming up next week
Learning focused

Diary writing

Properties of shape

Prepositions (because of, under, on, beside), first person and tenses.

Ways to support at home (home learning)

Discuss different shapes and what is the same/different about them. Promote talk about corners, edges, sides, parallel and perpendicular lines.

Writing a diary at home ensuring the use of first person. (I, our, we) This could be a diary all about their day on the weekend or a diary of their morning/evening.
