

Crystal Class News

23rd June 2017

Things to note:

As the weather begins to heat up, could all children please remember to wear sun hats and sun cream as well as bringing their water bottles each day?

We are also having a big recap of our 4 operations, linking with mental methods. Could I please ask for you to encourage your child to practise their times tables and number bonds (up to 100) as this will support their learning in class.

What we have been learning:

English: We have come to an end of our Iron Man story. I have been amazed by the standard to which the children write. Their descriptions of the cliff scene was beautiful and they made sure they were using their targets.

Maths: We have been finishing our learning on time and we have also looked at some data collection. The children have interpreted Bar graphs and solved problems using it.

Project 3: How can we look after others in our community?

After a long and very exciteable debate, the children learnt the value of putting across information which is fact and can be supported by evidence. They also realised how hyperboles (over exaggerated language) may sway the opinion of the reader... I hope you are all looking forward to your persuasive letter!

Next Week:

English: Editing of our stories and developing targets through different genres..

Maths: Problem solving with the 4 different operations and mental methods.

Theme: Researching charities they would like to raise money for with our Teddy Bear Sale.
