

Crystal Class News

7th July 2017

Things to note:

We will be postponing our teddy bear sale until Monday 17th July 2017. We hope you will be able to join us for our teddy bear sale and PE afternoon. More information will be sent out next week regarding this event.

Thank you to all who are considering sending in items to give to Barnardo's charity. We aren't asking for much but perhaps one item per child would equate to 31 items to be sold at Barnardo's and I am sure every penny will be appreciated. Could all donations be given in to Crystal Class by Thursday 13th July and we shall then take these items to Barnardo's ourselves. Thank you again for your support.

What we have been learning:

English: We have continued to develop our 'PEEing' (Point, Evidence, Explain) skills within reading comprehension, applying these skills to the inferencing of characters.

Maths: We have been reviewing the importance of estimation. The children have learnt that it is important to estimate before carrying out a calculation so they can compare both answers. The children then applied their addition and subtraction skills to problem-solving. They were able to use trial and error to find as many possible outcomes as they could.

Project 5: Dragon's Den – How can we decide who to help?

As we have continued through this project, the children have considered the many different areas in need around the world. This has now inspired them to create a presentation where they will try and convince the rest of the class to vote for their charity to support. Thanks to Ned and his excellent personal interest in helping Bristol Care, lots of the class have decided to research and present on this charity, however there is still a range of charities in question.

Once we have presented our presentations, the class will vote on who to support. The winning charity will then receive the money raised from our teddy bear sale.
