3<sup>rd</sup> February 2017

### PUPIL OF THE WEEK

TJ has this award for being a fabulous learner and for growing her diamond and emerald powers.

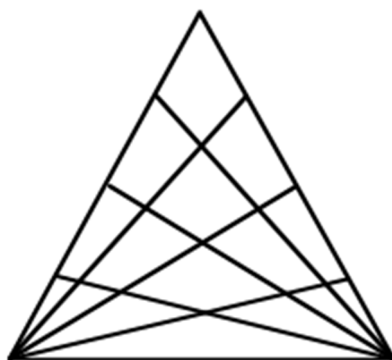

This week: We have been learning the names of quadrilaterals and investigating their properties. Below I have added a copy of the puzzle the children have been working on in their morning challenge so that you could solve this together. Please send your solutions in next week.

It's been a busy week -number day was a huge success and so too was hoola hooping day today.

The Puzzle:

How many triangles and quadrilaterals are there in this diagram?
