

Diamond Class Newsletter 05.05.17

We had a fabulous day at Westonbirt Arboretum!

We experienced what it was like in the tree canopy whilst we walked along “The Treetop Walkway”.

Some of us braved our fear of heights and climbed to the very top of the crow’s nest.

We collected lots of natural things and C was amazed at the size of these pine cones. He even brought some home in his lunch box!

We learnt about food chains and all of the activities were kinaesthetic. Here we are being Jays and understanding what could impact on the bird’s survival .

Next week:

We will be continuing learning about food chains in nature and I have asked the children to research this at home over the weekend and bring in any information which they might like to use in our Science next week.

We will be securing calculating area and perimeter by applying learnt skills to problem solve.

After we have finished writing our reports about the trip, we will start narrative writing through the study of the book “Wolves in the Walls “. We will be dramatising parts of the text and orally rehearsing the plot.

Mrs Moncrieff
