Diamond Class Newsletter

We've had a busy start to the new term, beginning our project for terms 5 and 6. We will be learning about the geography and history of Bristol as well as linking our learning to our class book, 'The Train to Impossible Places'.

For our project launch on Monday, we became engineers, building bridges strong enough to withstand wind and hold weight. We also had a paper aeroplane competition which was a lot of fun in the blustery wind!

We began our geography learning for the term by starting to compare Wickwar as a village to Bristol as a city, looking closely at maps of both and identifying features using OS symbols.

Next week, we are hoping to go for a walk around the village to learn about the history of Wickwar as well as conducting a geographical study, collecting data about traffic in the village.
