### PUPILS OF THE WEEK

IK has achieved the most house points this week for Weaver's House.

OW has the teacher's award for being a super learner.

This week:

We have been developing our computing skills and learning the techniques of animation on the Learnpads. Our question was "Can we make our Mythical characters move?"

We linked this with both our History and our English learning too.

Thank you for supporting your children with Bug Club reading.

This week I talked to the children about the way in which they were to answer the quiz questions. From monitoring the children's written responses it was evident that they need much more support both at home and in school with this. I have set one e-book this week to be read alongside their current reading book. I am able to respond to the children's written responses; it shows by an envelope on their home page.

We will be focussing on fractions and decimals in the coming weeks and, in readiness for this, it would be advantageous to practise recalling timetables.

Mathletics is still being set every Monday and links to our current mathematical learning.
