

Emerald Class Newsletter

23.6.2017 – Term 6

What have we been learning?

This week the children carried out a science investigation. First they made their hypothesis and made sure they were prepared to carry out a fair test. The children wanted to know what would happen when they tipped vinegar into baking soda. Well see for yourselves...

The children have also been discovering the value of money, using the coins to solve problems and add up to different amounts.

We have made a great start to designing our photo frames, measuring the lengths and deciding the best material to use.

Next Week

Sports day and we are beginning to make our photo frames and begin practising ready for our talent show!

Dates for you Diary

Emerald Talent Show – 14th July at 9:30 – After the show you will have a chance to look through Learning Journals.
