

Jet Class Newsletter

16.9.16 – Term 1

What have we been learning?

Jet class have been busy using positional language to direct rockets around planets in maths and ICT.

In groups, we have been researching and answering curious questions about space vehicles. What does it look like? How does it move? What is it made from? The children have been writing a report about a space vehicle of their choice. They worked together to decide on a WAGOLL for our reports.

The children loved their bike/scooter morning; they had the opportunity to improve their physical development and practice their coordination skills whilst controlling their scooter/bike.

What's happening next week?

We will be composing our own Harvest poems ready for Harvest next week.

In maths we will be learning about 3D shapes, including number of faces, vertices and edges.

In DT we will be designing our own space vehicles ready to construct over the next few weeks.

Reminders

Come and join us for the school fair on Saturday 17th September.

Please check your child's book bags for homework coming home today!
