

Jet Class Newsletter

11.11.16 – Term 1

What have we been learning?

Jet class have really enjoyed aspirations week; they haven't stopped talking about their visit from Tom Robson! We have been trying really hard to use our Diamond gem power of problem solving and have been standing on the edge with our learning.

We have written some super character descriptions about Bob on the moon and challenged ourselves in maths to solve missing number addition problems.

We have developed our 3D art skills through manipulating and sculpting clay into astronauts ready for our animations. The children used various tools and techniques to create lines and shapes.

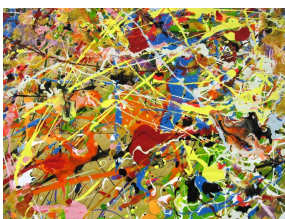

What's happening next week?

Next week we are going to be planning and writing our own Bob on the moon stories to use for our animations.

We will be using our addition skills to solve money problems and challenges.

In art we are going to be studying the work of the artist Jason Pollock and creating our own space paintings in his style using his techniques.

Reminders

Thank you for your support with your child's home learning; please continue to support them weekly with the learning we send home.

The children have been sent home with words and songs to learn for the Christmas play; please help your child remember their lines and be able to read them confidently and clearly.

Your child will be coming home with a mathematics log in and password today. This means they can apply the skills they have learnt in school to challenge themselves in different activities on the computer.
