

Jet Class Newsletter

22.09.2016 – Term 1

Jet Class needs:

Please could you collect and send in the following next week. We will be testing to see which would be best for our moon buggy wheels! We need

- Plastic bottle lids
- Jar lids
- Yoghurt pots

What have we been learning?

We have been set lots of challenges by NASA during this week!

We have been asked by Tim Peake to confirm that his space suit needs all the properties it currently has, such as the importance of having a transparent visor, as NASA wanted to change it!

We were also asked to investigate the properties of 3D shapes, so that NASA can use this information to help them with their space shuttle.

Even more excitingly we have been asked to design a new moon buggy or space shuttle, look out for our designs coming soon!

Next Week

Next week, in Jet class, we will be finishing our design and beginning to construct our moon buggies and space shuttles for NASA.

In English, we will be looking at character description and creating a WAGOLL to help us write our own description based on Bot from the story 'Man on the Moon.'

In Maths, we will be continuing to work on our addition skills.

Some of us, will also be sharing our Harvest Poems in church and at the coffee morning.

Dates for your diary

It is Harvest Festival in the church on Tuesday morning, we need some parent helpers to walk with us up to the church. If you are able to help us, please could you let Miss Pursey know on Monday.

Don't forget about your home learning - to investigate an astronaut.

In your home learning book, you will now find your common exception words. These will be tested on Monday.

Have a great weekend!
