

Jet Class Newsletter

02.12.2016 – Term 3

What have we been learning?

We had a great start to the week, when the Year 5s came to help us create our space animations. We used lots of props, including our clay astronauts, our Jackson Pollack planets and our IT rockets. We created our animations on a programme on the learnpads. We can't wait for you to come and watch them.

We have also been learning a new method in maths, to help us with our adding called column addition. Why don't you ask us to show you how to do it!

Next Week

We have been very busy practising our Christmas performance for you to come and watch next week. The times of the performances are as follows:

Wednesday 7th December at 2:45pm

Thursday 8th December at 9:30am.

Also next week we will be making our Christmas decorations, which will be on sale at our stall at the Christmas Fair on Friday 9th December for £5.

We will be continuing with our column addition and estimation skills in Maths; in English we will be beginning to write a non-chronological report on Neil Armstrong who we have been learning all about with Mrs Gee.

Other News:

Just a reminder that there will be a chance to spend the morning with us watching our space animations on Wednesday 14th December at 9:30am. You will also get to see all of the amazing learning we have been doing since September for our theme 'Is there anything out there?'

Next week please could your child bring their favourite story book in from home, as we are hoping to create a reading display of all our favourite stories to encourage other members of Jet class to want to read them? Please help your child to prepare to tell their friends why it is such a good book to read!
