Welcome back, we hope you all had a lovely half term. Thank you for supporting your child with their home learning on both Bug Club and Mathletics.

What have we been learning?

We have arrived in the continent of Australia this week and have kicked started our two weeks by reading the aboriginal story of 'Tiddalick the greedy frog'. The children developed their retelling skills through role play and freeze frames. They acted out the main events in the story becoming various characters. Can you guess which characters we are in our freeze frame?

We have been creating a class story map of 'Tiddalick' to help us develop our ideas for story writing.

Next Week

The children have been set home learning on mathletics this week. For this test please encourage your child to work completely independently to answer the Arithmetic questions. We have been learning about division this week and the children have completed a practice SATS arithmetic test in school. The only section the children may still find tricky is the fractions. We are happy for them to leave these questions blank.

Other News

We have now made a DVD of our space animations and dances. If you would like to purchase one, please send £1:50 in a named envelope with your child. We will send these home with your child if purchased. We will be using the money to buy resources for the classroom.

Thank You

We still need volunteers to help with sewing next week, the children will be creating rain drops using

Term 4

We will be retelling the story of 'Tiddalick' and writing an alternative ending to the story. In maths we will be continuing to develop our division, multiplication and inverse skills.

felt to create a class monsoon display. A big thank you to those that have already offered.

We are also looking for helpers to come into school the week beginning 6th March to cook with the children either Wednesday, Thursday or Friday. Please let us know if you available to help.
