## Topaz News

### New learning environment

Over the Easter holidays the inside and outside environments have been changed. Inside has quite a calming natural feel with a tree house reading area, jungle role play and lots of other areas to choose to learn in. We also have a very large spider that will be offering us some mathematical challenges. We have continued learning shape language. It would help the children to embed this if you use the language when you are out and about or at home.

Outside there has been a big transformation too. The fence has really made the area look more purposeful. We will, of course, be learning beyond the fence in the willow, garden and green areas around. The children who have tried out the sand have all really enjoyed it! Thank you to Mr Murray for another big building project completed! We also have an animal rescue and research centre and plan to have a 'making' area outside.

### Keeping Healthy

We will be planting vegetables as part of our learning about making healthy food choices. This, of course, also links to us developing our curiosity.

### Going home

Thank you for your co-operation with the changes to arrangements for going home. The children, as always, have been very adaptable. If you can try to find a space near the gate, it will make it much quicker and safer for the children.

Kind regards, Sally Windmill
