

# Amethyst Class

## Newsletter

### **Cycling**

All the children have progressed successfully onto road training this week. The focus for the first week has been on road positioning, going around parked vehicles and learning about who has right of way on the road.

### **Panto**

We have started to rehearse the script as well as the songs this week. If you could continue to help the children learn their scripts at home that would be very helpful.

### **Maths**

This week we have focused on problem solving with time and distance, whilst keeping up with our daily arithmetic practice.

### **English**

It has been a busy week of writing: Letters, review of the year and completing of trench stories.

### **Design and Technology**

The children have been designing an Eco-Friendly theatre. They have been considering how they could use recycled materials, green energy and make the building fit into the natural environment.
