Our learning this week...

English

We have been writing a response to the proposed housing developments in Wickwar, sharing our findings after our field trip around the village last week.

Project – Who has the power?

The campaigns have begun- with initial setting up of parties and formulating names, mottos and what they stand for.

Science- Classification

On Monday we were investigating the most common invertebrates in the school grounds. The most common species was Woodlice, with most groups finding they made up to over 50% of all invertebrates discovered.

Home learning

Some children are starting to let the home learning slip and I have noticed a number of children not regularly doing tables, spellings or Mathletics. The expectation for ALL children is the following:

TTRS every week

Mathletics completed before Wednesday morning

Spelling practised every night (they are tricky and need to be done daily)

Termly home learning project – next one due Friday 15th October.

They will be at secondary school before they know it and it is important that they get in the habit of doing something each night.
