Our learning this week...

Project – Why do people leave their homes?

History

The children have been busy researching their own enquiry into life on the Home Front.

English

After planning a story map, most have now started their own story set in WW2.

Maths

Our learning moves on to Area and Perimeter.

Covid Home Learning

There have been a group of children each day who have been home learning due to Covid Isolation. I have been setting the class work on Google Classroom for these children to do and they have done a brilliant job getting on with this from their isolated rooms!

SATS parents Information

I have made a pre recorded Power Point with every thing you need to know about SATS. This is available to watch and listen to on the class Google Classroom – Just get your children to log in and open it up for you.

Science

We have had fun with torches and mirrors this week, studying reflection.
