

# Amethyst Class Newsletter

## Our learning this week...

### How are other countries ruled?

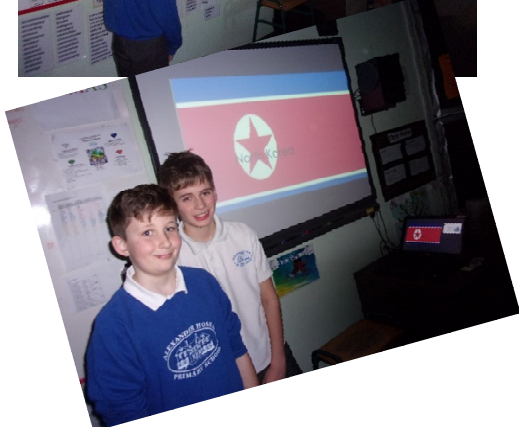

The children presented their project to the class. They were all very well organised and we certainly learnt a lot about the political structure of different places. The children also chose different human and physical features to research and these were included in the presentation.

### Maths

We have finished our topic on fractions, decimals and percentages and the children have worked hard solving a range of problems connected to finding the equivalents.

### English

We are continuing to enjoy our class book-Mortal Engines. We have been learning how to write balanced arguments and this week we considered the question: Should pupils have to wear a school uniform?
