Our learning this week...

Maths

The focus this week has been learning how to divide by a two digit number. The method we use is 'Long Division' the children have been working hard on learning this new skill and many said they now felt confident with this. We will be continuing with division and applying to different problems and challenges.

English

The children have been written their own persuasive argument about a local environmental issue. They have tried many of the features out in their arguments and some are definitely very persuasive!

Science

We have started our electricity topic (Linking in with Eco-Homes and climate change). There was great excitement as the children created electric circuits today!

Anti-Bullying Week

The whole of this term has a PHSE focus of Celebrating Difference (I have shared details of this on Google Classroom) but this week we had an extra spot light on Anti-bullying. We have watched assemblies, made a list of 5 people we could talk to, reviewed the charter and thought about things we can do in the playground to include everyone. The children looked very colourful today in their Dare to be Different clothes (see photo below).
