Our learning this week...

How Can We Make Life Fair?

Science

We have had a science focus this week and have been learning about classification of organisms. We have looked at the different layers of classification from sorting into Kingdoms in to identifying individual species.

Maths

This week has been assessment week for Mathematics and the children have completed a full set of SATs papers. We have talked about the fact it is still early in the year and they will improve greatly over the academic year. I have explained to the children that they are not to worry if they can't answer many questions at this point in the year.

English

We have been exploring the growth of the characters in our class book and have written a letter from Dani to his father explaining how he has changed.
