

# Amethyst Class Newsletter

## Our learning this week...

### Can You Crack The Code?

#### Rationing

We have started our unit of learning on rationing and we had a visitor to the class room –Mrs Leyton, who is a dietician. She led a very interesting session on why we have rationing and comparing the diet and health of children in WW2 with the health of children today.

#### Art

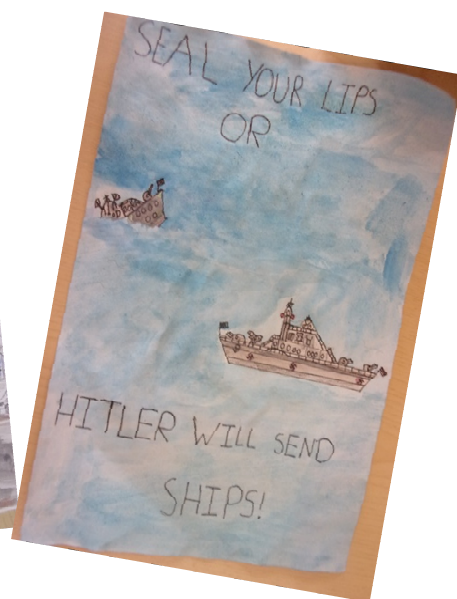

The children have finished designing their WW2 Propaganda Posters and they are now displayed in the Year5/6 corridor. I am pleased with their art skills and the messages they have got across through their posters.

#### Science

The children have really been enjoying the science unit on light. We had a great practical lesson where the children used mirrors and a torch to get a beam of light to travel through a maze.

#### Sats meeting

Thank you to the parents who attended the SATs meeting and for your continued support with the children's learning at home. Many of the children have been telling me about the extra work they have been doing at home with great enthusiasm!
