

Amethyst Class Newsletter

Our learning this week...

How Can We Make Life Fair?

Geography

The children have presented their projects to the class and we have discussed physical and human features of the places chosen.

Maths

This week we have been sequencing, giving next terms and describing patterns and rules for different linear sequences.

English

The stories are finished and the children have been busy editing them independently and with a peer.

Art

On Thursday we spent the whole day on a large 3D art and design project. We worked with 2 designers from Dallas-Pierce-Quintero, who talked to us about helping them with a project they are working on with Bellway Homes. The children designed 'chairs' that could be used in a community art installation and then they built life size cardboard models.
