

## Amethyst Class Newsletter

This week we have been learning how to calculate averages in Maths. We have continued writing our balanced arguments and Fact files on France. On Wednesday, we had a visit from KLB science department who delivered an exciting lesson where the children dissected hearts. Mr Goode (KLB Science teacher) was very impressed with the children's knowledge and their curiosity as they got stuck into observing and investigating the various chambers!

**Wednesday 20th** – STEMWORKS in school experience day. This is a full 'trip' experience (9am – 3.30pm) where the children will build and create electrical models controlled by a computer program they have written. We have tried to reduce costs for this trip by having STEMWORKS come to us and save parents the added coach costs and also allow much more time to actually create the models.

Coming up Next Week Learning focused	Way to support at home (home learning)
Maths-Measurement problems. English – Writing setting descriptions. STEMWORKS – science, Maths, computing, D/T	Spelling – Contractions (examples in their orange books)  Art – Abstract art or fact files due in by next Friday please.  Continue with the SATs busters, TTRS and lots of reading.

*Hope everyone has a lovely weekend.*
