### Our learning this week...

#### Project – Why do people leave their homes?

##### History/Jigsaw/ DT/Maths

We have tried out a Wartime rock cake recipe, looking at techniques used to make them and carried out taste tests too. The children calculated how much the batch of rock cakes had cost and worked out price per rock cake and the amount of ingredients we will need to make 60 Rock Cakes for our learning share afternoon.

##### English

The children have written an edited a balanced argument around the question: Were children healthier in WW2 than children today?

##### Science Week

This week was Science week. We launched the week with a special assembly and joined with a Science Live lesson, with schools from across the country. Our Science Live lesson was on a farm and we were very lucky to witness the birth of a new calf whilst filming took place! We have been continuing our unit on the Human Body and this week carried out pulse investigations. **Tree Planting**-Together with Topaz class, we were lucky to be involved in the planting of fruit trees on the field for the Queen's Jubilee year.
