Our learning this week...

Maths

This week we have moved on to calculating volume of cubes and cuboids. We finished off by completing an interlocking cube challenge activity.

English

We have been writing explanation texts linked to last week's Home Front Experience: How to put out fires after a bombing raid.

Science

Reflection and refraction-The children had great fun making a mirror maze and getting the light to reflect so it could travel around corners to the end of the maze.

World Book Day

All the children had dressed up as a favourite book character and were able to talk about a favourite book as well. They completed book reviews or book cover designs for their chosen book.
