### **SATs Week**

The children will be enjoying a well-earned treat today (Friday): film and some nibbles too! They have approached the tests very calmly and I truly believe they have all given the tests their 'best shot'. They have enjoyed some time together on the field after the tests to relax and play games. They have continued with their stories and have been working on individual Viking projects.

### **Transition**

Consultations have now begun between myself and year 7 teachers working on plans for a smooth transition to secondary school. Next week we have visits from the teachers to meet the children and to chat to me about each individual pupil. Dates have been confirmed for KLB transition day (Monday 1<sup>st</sup> July) and parent and child transition information evening (12<sup>th</sup> June), invites will be sent to you from KLB. I will also be asking the children for suggestions of who they feel would be a good friend for them to have in their tutor groups.

### **SRE Education:**

Year 6 will be learning about the changes to our bodies as we move on to adulthood and in particular how babies are made. As well as learning in class, children will be watching two short videos (How Babies Are Made and How Babies Are Born) on Wednesday 22<sup>nd</sup> May.

All children will have the opportunity to watch the videos which will be shown as part of our learning this term.

Prior to the children's viewing, I invite any parents/carers to view the videos on **Monday 20<sup>th</sup> May 2018 at 9:15am**. If you are interested in watching the videos, but are unable to attend the viewing, please do not hesitate to contact me.
