

# Amethyst Class

## Newsletter

### Our learning this week...

**Science** – Healthy Bodies. Digestive system. I recreated the process of a digestive system in class – much to the disgust and delight of the children! The children have written about the process: some did stories, others made cartoon strips and some wrote a scientific explanation.

**English** – Newspaper reports. We read an article format from the Gazette about a WW2 bomb found on an allotment in Wotton. We then imagined what would happen if one was discovered on the school field during a school day! The children's newspaper reports are excellent and very entertaining.

**Maths**- We have moved on to volume this week and have been focusing on volume of cubes and cuboids. Finishing with a practical task making interlocking cubes that are the cube numbers up to  $1000\text{cm}^3$ .

**Reminder:** Don't forget to remind the children to dress in their WW2 costumes and bring a rationed plate of party snacks for Monday. I will film the children singing and post on Google Classroom.

**National Day of Reflection** – The year 5 and 6 children drew a leaf and wrote reflections of the past year and hopes for the future on them. We have created a Tree of Hope in the corridor.
