

# Amethyst Class Newsletter

## Our learning this week...

### Maths

#### Number 8 Day – Whole School Maths Investigation Day

All the children were busy solving different Maths challenges all linked to the number 8. In Amethyst the children had a choice of 8 very different challenges, constructing an Octahedron, researching the 8 largest world populations, solving number puzzles and cracking codes.

### Project:

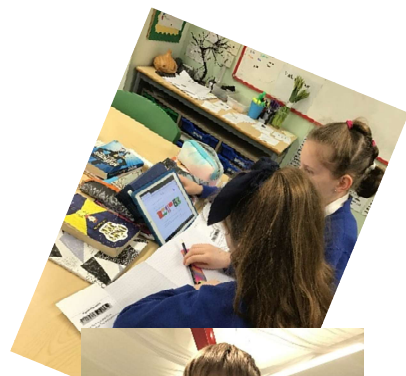

The children have been working on their own historical enquiry linked to an aspect of WW2.

### English:

I have been very impressed by all the children's stories linked to our project and class book. They have been editing and peer assessing their own work. I look forward to marking their finished stories over the half term.

Amethyst class have been learning how to play volleyball this half term.

SATS parents' meeting first Tuesday after half term. 9.15am – 9.45am. I have put all information onto a power point, which will be emailed after the meeting to all parents.
