

# Crystal

Lots of excellent learning in Crystal class over the past few weeks! We had our trip to the Wild Place which was wonderful and the children loved seeing the bears have a paddle in their pond!

We have been practicing lots of different mathematical aspects over the past week. Finishing off looking at measuring, practicing our number bonds with a dice game and looking at a multiplication grid to find our fractions. In English. The children have written a letter as if they were a rock telling the story of their journey through time and are now preparing a narrative based on The Pebble in My Pocket that goes through Stonehenge and ends up in The Little Avon River.

We have also been creating our pop-up toy cards! A lot of them inspired by Stonehenge, they are looking lovely and the children are showing great resilience.

Next week, we are going to Stonehenge. I will send out an email today so please keep an eye out for this.

Have a lovely sunny weekend!

Coming up next week

Learning focused

Writing a narrative

Maths recaps, number bonds, fractions, perimeter, written calculations

Way to support at home (home learning)

Reading a new style of book to your children before bed so they can experience new genres.  
Exploring a local habitat.

Times tables!
