

Crystal

In Crystal class this week, we have been doing some great learning. We have had a hands-on maths lesson to learn about all the different ways we can draw and create shapes. The children were able to experience using a compass for the first time to draw a circle and it was great to see the children persevere, especially when they found it tricky. We have also been looking at and creating our own 3D shapes, using modelling clay and KNEX to build skeleton shapes.

In English, we have started looking at how to write a persuasive letter. Next week we will be writing a letter to other year 3 students to persuade them to study The Stone age and read our class books, The Pebble in my Pocket and The Stone Age boy. The Stone Age has gone down brilliantly with the class. They are all so keen to learn more about this time in history and they have been creating some amazing pages in their learning journals to tell us all about The Stone Age. We have spoken about how we can present our work in different ways and keep our work neat.

A highlight from this week for me was PE where we have been focusing on athletics. The children have been loving being able to get outside and practice their skills ready for sports day. The children also continued their cornet lessons, and they are doing amazing.

PIC•COLLAGE

Coming up next week
Learning focused

Maths- time
Science- forces

English- letter writing

Way to support at home (home learning)

Practice reading the time with children. A good place to start is understanding a 12-hour clock. The minute hand being longer and the hour hand being bigger. Recap the o'clocks. (12o'clock, 4o'clock)
