

Crystal Class News

11th May 2018

Welcome to Crystal Class Newsletter:

This week:

During Maths, we have been trying to link our PE skills with our measuring skills. The children compared their measurements and plotted graphs to compare who jumped the furthest, threw the shot put the furthest and who jumped the highest on the verticle jump. It was lovely to see how the children have been developing their skills as a team.

In the build-up to our clay farm, the children were using shape to mould farm animals. It was helpful for them visualise which shapes would be needed to make different parts of the animal.
