

# Crystal

For the final week of term, we have been very creative! The children have made their own shadow puppets to perform in a shadow show in science and made their own non-chronological reports on the Greek Gods and Goddesses of Greece.

In maths, we have finished our fractions topic and moved on to recapping multiplication and division. We will be practicing problem solving with multiplication and division and making sure we understand the techniques. The children must know their times tables for these otherwise these methods are extremely tricky. I do only pick calculations around the times tables they should know but at this point in year 3, the children should be very confident in 2,5,10,3's and 4's and being able to recall some of their 8's.

I have had several children that have asked me when we are going swimming. This will be middle of next term, and a letter is being sent out to parents within the first week back. I will then send out an email closer to the time with the extra details. We do need some parent help for these days if anyone is interested, please get in contact.

Have a lovely half term.

Coming up next week Learning focused	Way to support at home (home learning)
Statistics and using tally charts.	Reading comprehension Greek homework (sent in email) Statistics and data completion
