

Crystal Class News

27th April 2018

Welcome to Crystal Class Newsletter:

This week, we have been planting our seeds and carrying out scientific investigations to see what the best environment is for seed germination. The children have learnt how to carry out a fair test, using independent and dependent variables.

On Thursday, we had a visit from Mr John Lloyd, who talked to us about life on a farm during the 1940s. The children were fascinated about farm life and studied the photos from his PowerPoint closely. He taught us about life at school and the toys he would play with back then.

He finished with the a sing song which mesmerised the children so much that they were completely oblivious that it was then their lunch time! A wonderful visitor.
