

Crystal Class News

25th September 2020

This week:

In Maths, we have been using our knowledge of place value to order numbers. We started doing this as a team which then led to independent ordering and then onto problem-solving. The children did an amazing job and it is great to see them applying their knowledge of place value.

In English, we have been looking at how to build our simple sentences into compound sentences. The children have recognised what makes a compound sentence. We spent time building them in teams, then we wrote them and we then applied them into our descriptive writing.
