

1<sup>st</sup> March 2019

# Crystal Class Newsletter

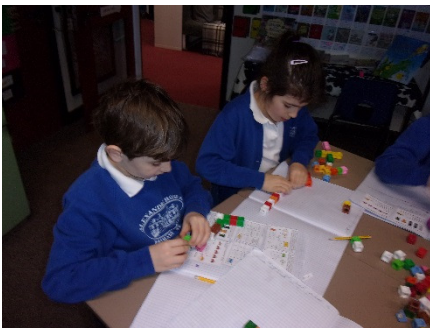

We've had a fun filled week in *Crystal Class* this week!

In Science, we are starting to explore plant life. The children have been investigating what plants require for life and growth. We have also set up a runner bean experiment in the classroom...ask your child to tell you all about it!

In English, we have been looking at how a sentence is constructed and how to add more detail to make a complex sentence.

Maths has seen the children building on their knowledge of fractions. We have been looking at how we can use our multiplication and division skills to help us calculate a fraction of an amount.

PE this term will take place on Tuesdays and Thursdays. Our focus is street dance.

## For your information

Please sign and return Berkley Castle trip forms.

Crystal Class will also be visiting the Edward Jenner museum on the same day as the Berkley castle trip. There will be no cost for this trip, as we will be using funds raised from the Christmas fair.

Please continue to read with your child (x5 in a week) and sign/initial to say you have read with them.

Home Learning is due in on Friday 29<sup>th</sup> March - to be shared with peers.
