

Crystal Class News

26th January 2018

Welcome to Crystal Class Newsletter:

This Week:

This week, the children have been learning about non-standard English in dialogue. This is to help develop characters within our story. We are trying to portray the character of a Stone Age girl named Om. The children were fabulous in understanding how Om would speak.

In Maths, we have still continued with our problem solving as well as delving into the world of fractions. The children have been looking at why fractions need to be equal and identifying the denominator and numerator. The children needed to reason why and how they labelled their fraction using the correct language.

Daisy was explaining her problem-solving method to the class.

During our project, we have been learning to write algorithms as part of our programming learning. The children acted as robots and were given a set of instructions to follow. When the algorithm went wrong, the children needed to debug.

The children progressed onto making algorithms and debugging probots.
