

# Crystal Class News

29<sup>th</sup> April 2022

## Things to note:

**I hope you have all had a lovely Easter holiday. I can't believe that we are now into term 5! This year seems to be flying. With that in mind, our SATS are approaching quickly and we are practising a variation of problem-solving questions in class. I shall be sending home more of these types of questions for your child's homework.**

**The children are practising reading time on analogue clocks. Can you please practise with your child at home as well to reinforce the learning? I will set some time learning on Mathletics to support their learning further.**

## This week:

In English, we have been learning about possessive apostrophes. The children have been applying these apostrophes to their writing. It is very tricky to remember when to use them but we are certainly building this skill.

In Maths, not only have we be learning how to read time but we have also started to look at fractions. The children have been investigating equal parts and how something can be broken into groups or parts. We have also been looking at problem solving in different ways. It is so wonderful to see how much the children have come on with the different areas of Maths. We shall keep ploughing on with this.

This week, the children have had their Wow day. During this day, the children learnt different circus skills and they created their own magic tricks. It was a brilliant day and everyone seemed to have great fun!
