

Crystal

We have had a very busy week in crystal class; Christmas play practices are full steam ahead as well as completing all of our learning! The children are working through it all brilliantly. We have just finished our multiplication and division block! Times tables are important to helping them achieve this goal and children NEED to be practicing these as much as possible.

In English, we have started to look at how to write instructions. Our end goal will be to write instructions for TAG rugby. They had lots of fun reading and following instructions to play different games. The children's rugby sessions are going well, and they are learning lots of new skills. We have been very lucky to get outside for each session so far! We have also been finishing our artwork inspired by our two artists ready to sell at the Christmas fair on the 5th, practicing our French, talking about types of bullying including racism, homophobia and family relationships in JIGSAW, getting ready to make our egg boxes in DT, learning about plants and seed dispersal and learning about the ancient civilisations in History! Lots of learning happening in Crystal class.

There will be no spellings for the rest of the term due to all our Christmassy activities going on! We will still be testing times tables each week!

Coming up next week Learning focused

Looking at instructions and how instructions are written, what is the purpose of instructions?

Angles and turning, anti clockwise and clockwise

Way to support at home (home learning)

Do some baking or an activity where the children need to follow instructions.

Practice writing instructions

What angles can the children see around them

Anti clockwise turns and clockwise turns
