

19th October 2018

Crystal Class Newsletter

In English, we have started planning our own stories in the style of Meerkat Mail. The children have used alliteration skills to think about the name of their story. They have also had fun creating a home setting for their character using adverbs to build interest and add more detail.

This week's Maths has focused on estimation, addition and subtraction. We will be building on these skills over the next week and after the half term. To begin with we are focusing on what addition and subtraction looks like in different forms i.e. words, numerical, pictorial and bar modelling, and how these can be represented. We will then move on to written methods.

In Science we have been thinking about what a healthy lifestyle looks like and investigating different food choices.

Next week:

Monday 22nd October 3pm - 3.30pm - You are invited to Crystal class to come and see all of the children's home learning over the term.

Please can I continue to encourage you to hear your child read at least 5 times a week.

Thank you for your support.
