

Crystal Class News

8th June 2018

Welcome to Crystal Class Newsletter:

This week:

This week, we have been measuring weights and reading scales.

We have also been reasoning and problem-solving with measurements, converting units of measurement as we go.

- **Example: Put these into order and explain your reasoning.**

$\frac{1}{2}$ of a litre.

$\frac{1}{4}$ of a litre

300ml.

In our English, we have been writing character descriptions. We had great fun guessing who we were all writing about. The children have also been carrying out research for our leaflet, looking at food from the field to the fork!
