

# Crystal Class News

3<sup>rd</sup> December 2021

## **Things to note:**

Well, the Christmas spirit has definitely hit us and the children are so excited to wear their Christmas jumpers. As you know, this evening is the school fair. It would be so lovely to see as many people as possibly there to enjoy the different stalls and games. The wonderful Friends of Alexander Hosea have done another amazing job in organising this and it makes a huge difference to us as a school to have such brilliant support. Thank you so much to everyone who is involved in bringing the fair together.

## **This week:**

In English, we have now started our superhero stories. The children have been setting the scene and introducing the characters, attempting to use good vocabulary for their adjectives and verbs to try and make their writing more exciting.

In Maths, we followed on from last weeks Maths. We are all trying to carry over with our addition, using column addition and some of use are carrying over into the hundreds column as well. We have started to use this method in word problems too.

This week, we have started to program. The children became robots with their partner becoming the programmer. The challenge was create an algorithm to get their robot from one location of the playground to another. It was amazing to hear the mathematical language that was coming out in order to give their robots accurate instructions... some people found they needed to 'debug'.
