2<sup>nd</sup> October 2020

## **This week:**

In Maths this week, we have been learning to estimate number. This is a tricky process and the children have found it challenging as there is a lot to think about before you even guess the number. We have moved onto reasoning and problem-solving with it but I believe that this is something we need to continue with next week.

In English, the children have retold and acted out the story of 'how to train a dragon'. The children loved retelling the story and it was great to see how some children really got into character. Through our acting, we then became confident to write our story plans but with a slight twist... the children designed their own dragons rather than using Toothless. They are very excited about their designs and it is great to see them using their imaginations.

Photos from the children's acting above.

In our projects, we have been considering how to stay healthy and this will lead onto how we keep our dragons healthy. The children have progressed from muscles and skeletons to looking at food and nutrition and why we need it.

We have also been designing our Christmas cards.

Thank you for all the timestables games that have already been handed in on Google Classroom. They are amazing. The deadline for these are Monday 6<sup>th</sup> October 2020.
