

21st September 2018

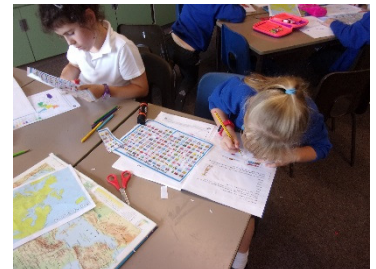

Crystal Class Newsletter

This week the children have been working hard on developing their place value skills. They have investigated how numbers can be represented in words, numerical form, expanded form and model form (pictorially). The children have enjoyed practising these skills and then consolidated them by answering reasoning and problem-solving questions.

We have continued to look at countries in Europe. The children have then been locating them on a map and using atlases to find out some of their capital cities. They have also enjoyed finding some of the locations from our postcards on our large class map on the wall.

Next Week:

Tuesday 25th September – is our trip to 'Wild Place Project'. Children to wear school uniform on top and then comfortable/sensible trousers (jeans, jogging bottoms, leggings etc) and trainers or wellies if the weather looks wet!

English: We will be creating story boards.

Maths: We will be counting in multiples of 4, 8, 50 and 100.
