

Crystal

Crystal have had a brilliantly busy week. We have started to look at Fractions in maths and the children have been super at ordering and comparing fractions. They have also been designing their clay dragon eyes ready to create next week. We also had our class trip (thankyou to Amelia who won this last year!) to the Edward Jenner Museum, where the children recapped their learning from last year and became vaccine engineers! They were able to work with a guide who helped create the covid vaccines. They created their own vaccines and then tested them in trays to see if they worked or not. They all loved it and found out so many interesting facts. The children had a go at using AI to create their own dragons using the descriptions they wrote in English. It turned out a great success and it was great to see the children's words visualised.

Amelia with the hedgehog she named for the Edward Jenner competition!

A collage of our trip to the Edward Jenner Museum!

Key dates coming up:

Childrens mental health week- 4/2/24

Coming up next week
Learning focused

English – letter writing. We will be writing a letter to the Edward Jenner Museum to thank them for our trip!

Maths- finding fractions of amounts. For example, what is $\frac{1}{3}$ of 18?

Science- creating our shadow puppet shows!

Art- Creating dragon eyes!

Way to support at home (home learning)

Recap the trip to the Edward Jenner Museum and looking at formations of non-fiction letters online. Reading 5x weekly

Asking the children to cut items into different fractions such as playdough, making cookies, pizzas etc.

Mathletics – this is always set to the learning we have completed so that the children can consolidate it.
