

Crystal

Welcome back to term 5! What glorious weather we have had coming back into school this week! We dove straight back into our learning and in maths we have been learning all about time! It is vital that the children know o'clock, quarter past, quarter to and half past and they should know how to tell the time to 5-minute intervals as this was learned in year 2. Please can this be supported at home as next week, we will be moving on to telling the time to the minute, digital time, 24-hour time and telling the time on clocks using roman numerals. In English, we have immersed into our new story of The Stone Age boy. The children have taken part in vocabulary searches, hot seating and other immersive activities to involve themselves in the story! On Friday we are taking part in our WOW day, the children will be making stone age shelters, creating cave art on the playground and creating sunset art of Stone Henge.

PIC•COLLAGE

Coming up next week
Learning focused

time on digital and analogue clocks
tenses in writing, past tense, present tense

Way to support at home (home learning)

Ttrs, mathematics, time telling
