Diamond Class Newsletter

This week in Science we have begun our new topic on sound. To begin our learning, we went on a sound walk around school before exploring how sounds are made through vibrations. It was an incredibly loud afternoon with drums banging and tuning forks being hit against tables before creating a splash!

In maths we have been using column addition method to add pairs of 4-digit numbers, progressing to solving problems with missing digits. In English, we have begun writing stories, applying the grammar skills that have been learnt over the last few weeks.

Coming up next week - Learning Next week in maths we will be focusing on column subtraction method. In English, we will be continuing to write our versions of 'The Phone Booth in Mr Hirota's Garden'	Way to support at home Read at least 5 times a week. Please ensure reading is recorded in the reading record books each week. Mathletics TTRS

Home learning project:

Using everything you've learned about rainforests, including the layers and the animals that live there, create a 3D model of the rainforest. Include labels and information about each layer and what can be found there. Look at the examples below to give you some ideas.

Be as creative as you can and use any resources you like.

Bring in your finished models and information by 9th December for us to share in class during the week.
