

Diamond Class Newsletter

09.02.18

Our learning :

The children attended a whole school assembly led by Miss Edgar where she launched this year's main theme of exploring how children should use the internet responsibly and respectfully. In class, we have spoken about posting pictures online and the dangers associated with this as well as gaming online. I am sure you are continually reinforcing how to stay safe online and monitoring your child's online activities too.

Home Learning Share

Thank you for attending our homework share this week. I am always amazed at how creatively the children interpret the tasks – they were extremely excited and very proud to show them to you and we will certainly be playing the grammar games in the coming weeks.

Reminders:

Next term in science, we hope to investigate how the digestive system works and the importance of teeth. In preparation for this, I am setting the children pre-learning homework for the holiday. I would like them to research and collate information from books/internet, through pictures, text, articles, dentist leaflets etc. about teeth. I don't want the children to write lots but to print information and bring books in so that they can then share and use in class. Thank you.

Mrs Moncrieff
