Working as a team to problem solve

Collaborative skills, communication and a lot of perseverance!

This week we have been looking at organising words according to their word classes and the children have been looking at sentences and trying to find the nouns, verbs, adjectives and adverbs. Here is an example:

The large white dog barked viciously at the visitor.

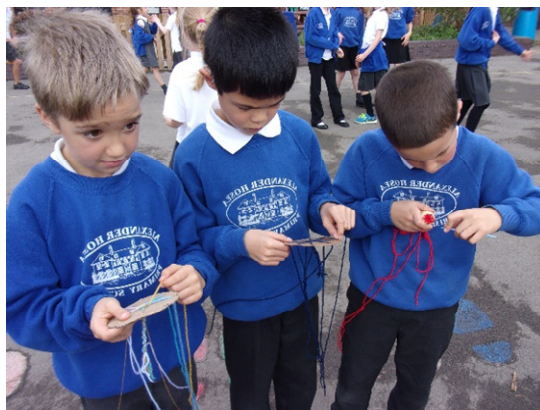

We have continued applying our maths skills to solve problems. Here is a similar problem for you to solve together.

Alice is trying to complete a sticker book. It needs 350 stickers overall.

She has 134 in the book and a further 74 ready to stick in.

How many more stickers will she need?

Thank you for donating red wool to our poppy making appeal, we are busy creating them so it's not too late to still send some wool in for us to use. Many of the children have been inspired to knit and it has been lovely to see so many of them busy in groups at playtime.

Mrs Moncrieff
